CECS 277 – Extra Credit 2 – Networked Rock-Paper-Scissors – 15 pts

Use your code from Project 3 to implement the following:

Make a GUI interface for your program. Have three buttons for the weapon selections, display an image of one of the three weapons for the computer player and the user. Have labels to display who won and the score. Network the game where the computer is the server, and the user is the client. Allow the user to choose between the beginner AI or the advanced AI.
